

Specialty Drug List

Specialty drugs are prescribed to treat complex chronic conditions such as rheumatoid arthritis, hepatitis C, and cancer. These drugs are often extremely expensive, and frequently have special handling requirements. As a result, they are generally not stocked at local retail or traditional mail order pharmacies. GlobalHealth has partnered with CuraScript to provide our members with access to these medications. CuraScript offers specialized pharmacy care for patients with these conditions. Medications are shipped directly to the member's home, work, or other location of their choice. Additional information about CuraScript's services is available on our website at www.globalhealth.com/pharmacy/curascript-specialty-pharmacy.

Medications on this list may be subject to a specialty tier copay. Please refer to your schedule of benefits or call the Customer Service number on your ID card for information regarding this copay and whether it applies to your plan.

#	Bebulin VH Immuno	D	Flebogamma	Hyperrab S-D
8-Mop	Benefix	Dacarbazine	Flebogamma DIF	Hyperrho S-D
A	Benlysta	Dacogen	Flolan	I
