2012 GLOBALHEALTH HIGH PERFORMANCE ABRIDGED FORMULARY

The following is a list of the most commonly prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your *Prescription Drug Benefit Plan*. The list is not all-inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate. You can get information and updates to this document at www.globalhealth.com.

TYPES OF PHARMACY NETWORKS

You have different options to receive your prescribed medications.

1. Retail Pharmacy Network

- Over 600 statewide pharmacies, including most independent pharmacies in Oklahoma communities
- Over 30,000 pharmacies nationwide, including most major chains
- To locate a Network pharmacy in Oklahoma, visit our website, www.globalhealth.com
- Search by name, county, or zip code
- To locate a Network pharmacy outside of Oklahoma, go to www.express-scripts.com or call the Express Scripts number on the back of your GlobalHealth ID card.

2. Home Delivery (Mail Order)

- Express Scripts Home Delivery, www.express-scripts.com or www.starhomedelivery.com
- 90-day supply available for maintenance drugs; list available on www.globalhealth.com
- Copay discounts may be available; consult your *Schedule of Benefits* for more information

3. Sovereign Medical Solutions (SMS) for Federally Recognized Native American Members

- Program information and Enrollment forms are available in the Pharmacy section. Please visit www.globalhealth.com
- Copay discounts may be available; contact SMS at 1-855-478-8725 for further information

4. Specialty Pharmacy

- CuraScript Specialty Pharmacy, www.curascript.com
- Specialized pharmacy care for Members with chronic illnesses, such as: Cancer, Hepatitis C, Multiple Sclerosis, and Rheumatoid Arthritis
- Drugs denoted with "SPE" are required to be filled at CuraScript

PRIOR AUTHORIZATION, STEP THERAPY, QUANTITY LIMITS, AND EXCEPTIONS

Your plan may include prior authorization, step therapy, or quantity limit requirements. These programs are based on current medical findings, FDA (U.S. Food and Drug Administration) approved manufacturer labeling information, cost, and manufacturer rate agreements.

Prior Authorization:

Physicians are required to obtain prior authorization for certain medications, to promote appropriate, cost-effective use. Without prior authorization, GlobalHealth will not cover the drug.

Step Therapy:

Step therapy requires one or more prerequisite, clinically equivalent drugs to be tried before a targeted drug will be covered. If a specific step therapy drug is Medically Necessary, your physician can contact GlobalHealth to request an exception to this restriction.

Quantity Limits:

For certain drugs there are limits to the amount of the medication that you may receive at one time. These drugs, if taken inappropriately for too long a time period, could be unsafe and cause adverse effects. Your Provider must obtain authorization from GlobalHealth in order for you to receive coverage for an amount of medication in excess of the set limit.

PLEASE NOTE: Not all the drugs listed are covered by all prescription drug benefit programs; check your *Schedule of Benefits* for specific exclusions and the Copayments for your prescription drug benefit program. For specific questions about your coverage, please call the phone number printed on your Member ID card.

For the Member: Generic medications contain the same active ingredients in the same amounts as brand name products. However, they may be a different color, shape, or size. You will pay the lowest Copayment for generics.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate. Thank you.

YOUR PRESCRIPTION DRUG BENEFITS

How to use your prescription drug benefits:

1. Fill your prescription at any GlobalHealth participating pharmacy. A list of Network pharmacies can be found in the *GlobalHealth Physician & Health Providers Directory* and on the website at www.globalhealth.com. To locate a Network pharmacy outside of Oklahoma, go to www.express-scripts.com or call the Express Scripts number on the back of your GlobalHealth Member ID card.
2. Present your GlobalHealth Member ID card to the pharmacist.
3. Pay the applicable Copayment.

REQUESTING A PRIOR AUTHORIZATION OR STEP THERAPY REVIEW

Your physician can request that GlobalHealth review your prescriptions for prior authorization or step therapy approval. Generally, GlobalHealth will only approve these requests if:

- the requested drug is not considered a limitation or exclusion on your benefits;
- the lower-tiered drug or additional utilization restrictions would not be as effective in treating your condition; and/or,
- would cause you to have adverse medical effects.

You or your physician should contact GlobalHealth for instructions on obtaining an initial coverage decision for a utilization restriction. Your physician may have to submit a prior authorization request form, with information supporting the request. Generally, a decision will be made within 72 hours or less of your request.

GLOBALHEALTH'S PREFERRED DRUG LIST

The GlobalHealth preferred drugs that are approved by the FDA are listed in this *Drug Formulary*. Medications on the list are selected based on quality (effectiveness and safety) as well as cost-effectiveness. Doctors and pharmacists have worked together to develop the formulary, which includes generics and brand name medications. The list of drugs is subject to change. Please check your *Schedule of Benefits* for detailed information regarding your individual drug coverage, benefit limitations and exclusions. For specific questions about your coverage, please call the phone number printed on your Member ID card.

Tier one Copayment: Generic medications contain the same active ingredients in the same amounts as brand name products, although they may be different color, shape, or size. You will pay the lowest Copayment for generics. There may be an even lower Copayment for certain generic drugs. Please refer to your *Schedule of Benefits*.

Tier two Copayment: Approved brand name medications on the formulary have the next highest Copayment.

Tier three Copayment: If your GlobalHealth plan has a third tier, the cost for non-formulary medications will be the highest of the three non-specialty tiers and will be either a Copayment or Coinsurance.

Tier four Copayment: If your GlobalHealth Plan has a fourth tier, it will cover most of the cost for formulary specialty medications. It has either a Copayment or Coinsurance. These medications must be pre-approved by GlobalHealth. Refer to your *Schedule of Benefits*. If your *Schedule of Benefits* has only one specialty tier, all specialty medications are in this tier.

Tier five Copayment: If your GlobalHealth Plan has a fifth tier, it will cover most of the cost for non-formulary specialty medications. It has either a Copayment or Coinsurance. These medications must be pre-approved by GlobalHealth. Refer to your *Schedule of Benefits*.

All medications included in the low-cost generic program are denoted with [LCG]. The list is also available on our website.

Medications named on the formulary are denoted with [SPE]. A list of the specialty medications is also available on our website.

Please contact Customer Service for printed versions of these medication lists at (405) 280-5600 (local), 1-877-280-5600 (toll-free), or 1-800-522-8506 (TTY/TDD/Voice), Monday - Friday, 9 am - 5 pm (CST).

In addition to using the *Drug Formulary*, you are encouraged to ask your doctor to prescribe generics when possible. Generics not only save you money, they also help GlobalHealth continue to offer prescription coverage at such reasonable rates.

The Copayments must be met each time a prescription drug is filled or refilled. The Member will pay the Copayment or the cost of the prescription drug, whichever is less.

Please contact Customer Service if you need assistance locating a pharmacy, understanding your benefits, or to request printed copies of the formulary.
